

A Fresh New Look at the Future of Wood Decking

Radiance is Thermally Modified Wood

With a proven process, using only heat and water to protect wood, Radiance is the perfect choice for your project and our environment. Those natural ingredients make Radiance a beautiful, protected wood that is completely non-toxic, protected against the elements and delivers the durability of traditional treated wood. Backed by more than a decade of research, development and testing. Radiance Wood is a natural choice over composite decking and is as beautiful as hardwood for a fraction of the price. It is 100% real wood.

Beauty, Protection and Environmental Perfection

Benefits:

- 100% chemical and metal free
- Non-toxic, no disposal issues
- Safe for the environment and people
- Made to last in outdoor applications
- Resist rot and decay mold and mildew
- Resistant to termites and other harmful insects
- Minimal water absorption
- Lower equilibrium moisture content
- Dried to less than 9% MC
- Dimensional stability
- Extremely limited shrinking & swelling
- Increased compression strength
- Improved surface hardness
- Excellent adhesion properties for paints, stains
- Resistant against warping and cracking
- Natural brown tone throughout the wood
- Patented exclusive factory finish
- UV resistant to preserve color integrity
- VOC Free
- Non corrosive to all fasteners
